"Student achievement improves when parents play an active role in their child's education, and good schools become even better when parents are involved."

Ministry of Education (2016)

You have a tremendous impact on your child's learning. We have created this guide to support you and the GECDSB’s mission which focuses on excellence in education by building confident learners, engaging with our communities and demonstrating ethical stewardship.

We are building tomorrow together - every learner every day!

What are ways to connect with my child’s school?

**School Website/Newsletter**
Check out the school newsletter or use the school’s website to check on activities and events throughout the year. Ask your child’s teacher if there is a different form of communication they use to keep in contact with the home (e.g. agenda, newsletters, apps, websites, and/or EDSBY, etc.)

![Edsby](https://www.publicboard.ca)

**Meet the Staff**
Start the year by meeting the staff your child will be involved with staff in September. Meet the Staff events occur within the first month of school. We look forward to meeting you during this informal event.

**Communication of Learning**
Initial Observations are sent home in November. The formal Communication of Learning report will be sent home in January and the second one will be sent home at the end of June. Please note that communication about your child’s learning can occur at any time throughout the school year.

**Parent Teacher Interviews**
Contact the school when you receive your child’s reports to schedule an interview or telephone conversation to discuss your child’s progress with their teachers.

**School Advisory Committee (SAC)**
School Councils have been created to enhance students’ learning through the cooperative efforts of parents/guardians, students, staff members, and others in the community. Speak with the administration at your child’s school for more information on how to participate and support your school’s committee.

**Greater Essex County Parent Involvement Committee**
The Greater Essex County District School Board Parent Involvement Committee (GECPIC) provides regular opportunities for parents/guardians to network, share ideas, offer advice and stay informed through educational presentations and relevant topics throughout the school year. GECPIC has established parental engagement as a priority and promotes communication among School Councils, parents/guardians, staff, community partners, Trustees, and the Director. To confirm dates and times visit [www.publicboard.ca](http://www.publicboard.ca) (Parent Involvement).
A SHARED UNDERSTANDING OF CHILDREN, FAMILIES AND EDUCATORS

OUR VIEW OF THE CHILD

All children are competent, capable of complex thinking, curious and rich in potential and experience.

The Kindergarten Program, 2016

OUR VIEW OF FAMILIES

Families are composed of individuals who are competent and capable, curious, and rich in experience. Families love their children and want the best for them. Families are experts on their children. They are the first and most powerful influence on children’s learning, development, health, and well-being.

The Kindergarten Program, 2016

OUR VIEW OF EDUCATORS

Educators are competent and capable, curious, and rich in experience. They are knowledgeable, caring, reflective, and resourceful professionals. They bring diverse social, cultural, and linguistic perspectives. They collaborate with others to create engaging environments and experiences to foster children’s learning and development.

The Kindergarten Program, 2016
THE KINDERGARTEN PROGRAM

The Four Frames
The four Kindergarten frames grow out of the foundations for learning and development. The frames align with the way children’s learning naturally occurs through play and inquiry and they focus on aspects of learning that are critical to young children’s development.

The four frames may be described as follows:

Belonging and Contributing
- Their sense of connectedness to others
- Their relationships with others
- Contributions as part of a group, a community, and the natural world
- Their understanding of relationships and community and how people contribute to the world

Self-Regulation and Well-Being
- Children’s own thinking and feelings and their recognition of and respect for differences in the thinking and feelings of others
- Regulating their emotions, adapting to distractions, and assessing consequences of actions in a way that enables them to engage in learning
- Their physical and mental health and wellness

Demonstrating Literacy and Mathematics Behaviours
- Communicating thoughts and feelings — through gestures, physical movement, words, symbols, and representations, as well as through the use of a variety of materials
- Literacy behaviours in the way they use language, images, and materials to express and think critically about ideas and emotions, as they listen and speak, view and represent, and begin to read and write
- Mathematics behaviours, evident in the various ways they use concepts of number and pattern during play and inquiry; access, manage, create, and evaluate information; and experience an emergent understanding of mathematical relationships, concepts, skills, and processes
- An active engagement in learning and a developing love of learning, which can instill the habit of learning for life.

Problem Solving and Innovating
- Exploring the world through natural curiosity, in ways that engage the mind, the senses, and the body
- Making meaning of their world by asking questions, testing theories, solving problems, and engaging in creative and analytical thinking
- The innovative ways of thinking about doing things that naturally arise with an active curiosity, and applying those ideas in relationships with others, with materials, and with the environment
The Kindergarten Program

The Kindergarten program is a child-centred, developmentally appropriate, integrated program of learning for four- and five-year-old children. The purpose of the program is to establish a strong foundation for learning in the early years, and to do so in a safe and caring, play-based environment that promotes the physical, social, emotional, and cognitive development of all children.

The primary goals of the Kindergarten program are:
• to establish a strong foundation for learning in the early years;
• to help children make a smooth transition from home, child care, or preschool settings to school settings;
• to allow children to reap the many proven benefits of learning through relationships, and through play and inquiry;
• to set children on a path of lifelong learning and nurture competencies that they will need to thrive in the world of today and tomorrow. (Kindergarten Program, 2016 – pg.8)

Supporting Your Child and the Four Frames

Here are some suggestions to contribute to the learning at home:

Belonging and Contributing
• Talk to your child about the important role they play in your family and in their community.
• Share your heritage and culture with your child and encourage them to ask questions to learn more.
• Model understanding that all persons have value and that we can benefit from being accepting and welcoming.

Self-Regulation and Well-Being
• Support your child’s independence in making healthy choices when eating, playing, and needing rest.
• Help your child identify and talk about their feelings.
• Encourage your child to try new things and to tackle challenges with enthusiasm and persistence.

Demonstrating Literacy and Mathematics Behaviours
• Read to your child every day and talk about the stories you read together.
• Engage your child in conversation about their interests and experiences.
• Support your child to continue to develop their first language, as it will support all learning.
• Notice and name the language and math in their play.

Problem Solving and Innovating
• Encourage your child to try different approaches to solving a problem after making a mistake or trying something that doesn’t work.
• Allow your child to gather natural objects to design and create things and encourage them to consider areas for change and improvement.
• Model questions for your child, such as “I wonder why...?” or “What if...?”
• Provide opportunities for your child to explore the outdoors.
### The Overall Expectations in the Kindergarten Program

# French As A Second Language

*Students will communicate and interact with growing confidence in French, one of Canada's official languages, while developing the knowledge, skills, and perspectives they need to participate fully as citizens in Canada and in the world.*

**Ministry of Education, 2013 FSL Curriculum Grades 1-8**

## What are the advantages of learning a new language?
- Strengthen problem-solving, reasoning, and creative thinking skills
- Support continuing growth in their first language
- Develop motivation, confidence, enriched social skills, and increased cultural appreciation
- Enhance opportunities for future success

## What are the different types of French programs?

### Core French
The Core French program is mandatory in all English Language schools, **beginning in Grade 4**. Students will receive 120 hours of French per year in Grades 4–8.

### French Immersion
GECDSB offers an Early French Immersion model within several elementary schools:
- JK – Grade 1 — 100% of instruction in French
- Grades 2–5 — 80% French (Language Arts is in English)
- Grades 6–8 — 50% French (Math, Science, and Language Arts are in English)
- For subjects other than FSL that are taught in French, the expectations in each course are those outlined in the English-language curriculum policy documents

The elementary school curriculum for Core French, Extended French, and French Immersion is designed to prepare students for success in the corresponding program at the secondary level.

## How can I support my child's learning of French?
- Talk to your child about the benefits of learning French
- Encourage your child to talk, read, and write in their first language
- Read aloud to your child in their first language
- Support your child’s exploration of French resources (e.g., books, songs, videos, museums, art galleries)
- Encourage your child to share their learning with you. They could be your French teacher!

## Talk to your child's teacher about other resources

Ministry of Education FSL

**NOTES/GOALS:**

www.publicboard.ca
# School Library Learning Commons

The only thing that you absolutely have to know, is the location of the library.

Albert Einstein

---

## What is available at school?

The GECDSB offers library programs with qualified Teacher-Librarians in our schools. All students have access to an up-to-date school library with collections that support curriculum, digital citizenship, inquiry, and reading for pleasure.

## Can we access library materials from home?

The GECDSB provides a “virtual library” for students they can use at school and at home — including access to eBooks, encyclopedias, research support, subscription databases, and much more.

Virtual Library Link: [https://publicboard.ca/Students/VirtualLibrary/Pages/default.aspx](https://publicboard.ca/Students/VirtualLibrary/Pages/default.aspx)

### www.publicboard.ca > Students > Virtual Library > Elementary Virtual Library Commons > eBooks

- **Unite for Literacy**
  - Read or listen to many stories in different languages.

---

These are some examples of the databases and encyclopedias within our GECDSB collection. All GECDSB databases and encyclopedias require a login and password which your child can obtain from his or her school Teacher-Librarian.
Carol Dweck’s research illustrates that in a fixed mindset students believe their basic abilities, their intelligence, their talents, are just fixed traits. They have a certain amount and that’s that, and then their goal becomes to look smart all the time. In a growth mindset students understand that their talents and abilities can be developed through effort, good teaching and persistence. They don’t necessarily think everyone’s the same or anyone can be Einstein, but they believe everyone can get smarter if they work at it (Morehead 2012). It is important to note that we all can possess each mindset in different situations and these terms should be applied to behaviours, actions, and attitudes rather than people.

Further reading on this topic could include:

“Mindset” by Carol Dweck
“How Children Succeed” by Paul Tough
