Description and condition of playground equipment:

School has two pieces of playground equipment:

Large composite piece of playground equipment is manufactured by Blue Imp Recreation equipment and was installed by the Board when the new Brock school was built. The play structure has two slides, tubes, ramp for handicap student access and overhead climbers. It requires new surfacing as the existing surfacing is now considered unsafe and not repairable. Cost estimate for new surfacing depending on type of surfacing ranges from \$9,000 to \$21,000. This play system is designed for students from 5 years to 12 years of age. Several items have been identified for repair which range from unsafe with liability issues to minor in concern. Estimated cost to address all repair issues \$8,000. Equipment will remain closed and fenced off for coming season until items are addressed.

And a smaller stationary piece of playground equipment is manufactured by Active Playground Equipment. The surfacing is a new approach for this type of play equipment which is a rubber mesh grid which allows grass to grow through to enhance the surfacing naturally. No outstanding equipment or surfacing repairs identified at this time as an issue. Students of all ages can play on this piece of equipment. General condition of this piece of playground equipment is good.
