2023 GECDSB STUDENT CENSUS
Grades 9-12

Welcome to the student census for students in Grades 9 to 12.
We want to learn more about you!

The information you share will help us understand the diversity within our student population so we can work to better support the learning and well-being of everyone.

Before you start the census, you should know the following important information:

- The census takes about 10 to 20 minutes to complete.
- The census is ***confidential***, but not anonymous. This means that no one at the GECDSB will see the individual responses of any student. Instead, this data will be grouped with data from other students. This data will be connected to other student information so that we can analyze academic and well-being outcomes for various groups of students.
- The census is ***voluntary***. You can choose whether you will participate in the census. If you do participate, but do not feel comfortable answering a question, you can select "prefer not to answer" and move on to the next one.
- There are no right or wrong answers. We want to hear from you, so take your time and feel free to share your thoughts honestly.

Thank you for your participation!

Disability, Chronic Health Condition and Exceptionality

Some people identify as having a disability because of a permanent or long-term condition that makes it difficult for them to function in an environment that is not fully inclusive and accessible. A person's disability may be diagnosed or not diagnosed. It may be hidden or visible. Some students who have disabilities may have an individual education plan at school to support them (an Individual Education Plan or IEP), but some do not.

*Defining disability is a complex, evolving matter. Disability is a term that covers a broad range and degree of conditions, some visible and others not (e.g., physical, mental, and learning disabilities, hearing or vision disabilities; epilepsy, environmental sensitivities).
